

Online Simulation Game Short-Term Trading

How do I optimise revenues at the spot market?

Introduction

Anyone who trades on the electricity market can earn a lot of money – or lose it. Do you want to be one of the winners? Then this simulation game offers you the opportunity to slip into the role of a trader in order to practise selling power plant capacities on the spot market. In this online simulation game, you sell electricity from a CCGT power plant on the German day-ahead and intraday market. This is a fun way to gain valuable experience for your own job.

Target group

- Specialists and managers in the electricity industry in the field of energy trading, procurement and sales
- Professionals from trading, marketing of electricity, balancing group, schedule, load or portfolio management of conventional or RE plants
- Newcomers and career changers in the energy sector with basic knowledge of the electricity market

Your benefits

After this simulation game, you will be able to:

- distinguish between buy and sell signals,
- explain spot market processes, and
- develop trading strategies.

Online Simulation Game Short-Term Trading

How do I optimise revenues at the spot market?

Your contents
