

PPA Database

Find your PPA partner

Solid data are the basis for successful business. Our PPA database provides you with an in-depth insight into current market developments in PPA deals. According to your request, we retrieve data on contracted volumes, terms, technologies, buyers and sellers as well as other transaction parameters. This gives you an overview of PPA trends in the markets relevant to you. If you have any questions on this topic, our energy market experts will advise you quickly and effectively on request.

Possible applications

Our PPA database allows you to,

- monitor market developments and
- search for suitable PPA partners.

Scope of delivery

- You receive the data in the form of a table per PPA market.
- On request, we supplement your market data query with information on current PPA price trends via our PPA Price Monitor Pro. You can find more information here:

About us

As independent energy market experts, we focus on the data-based, practice-related transfer of knowledge on electricity and energy trading in Europe.

In order to provide you with the latest energy market data, we closely monitor developments on the energy markets.

From analysis, forecasting as well as modeling of energy markets and prices, studies and individual consulting services to training courses, we are there to advise you.

Together we set the course for your future.

How can we support you?
